Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

The examiner agree with the applicant's assessment that the independent claims are different enough to require a specific rejection for each claim.

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claim 3, drawn to a data format conversion method, classified in class 717, subclass 136.
 - II. Claims 6-12, drawn to data format conversion equipment for utilizing an extraction means and a rule acquisition means for performing conversions, classified in class 717, subclass 139.
 - III. Claim 17, drawn to a controller for controlling a target machine in accordance with a second data format, classified in class 717, subclass 121.
 - IV. Claims 18-20, drawn to a control management system, which focuses on creating a program to perform conversions, classified in class 717, subclass 106.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another and materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the method of claim 3 does not require an extraction or an

acquisition components and therefore a different apparatus that does not utilize those means can be used to implement the method of invention I.

Inventions III and IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different designs, modes of operation, and effects (MPEP § 802.01 and § 806.06). In the instant case, the different inventions The invention of claim 17 (Invention III) provides for controlling a controller (that is also not required for inventions I and II) with a predetermined program of a second format; while, the invention of claims 18-20 (Invention IV) requires means for creating a control program (which is not required of any of the other group of claims). Therefore, as indicated by the applicant, the claims require different consideration for each grouping and restriction is required.
